The collaboration with Brian has been outstanding – and he really lives his #Thinklikeafan philosophy– especially when he took his time to talk and engage with the participants at the conference all day long, evening, and even into the night. Both before and after the event, Brian has been very flexible regarding customer sessions and meeting the press. I hope to be able to work with Brian again in the future. My highest recommendation!"

"Working with Brian was such a breath of fresh air! Brian wanted to learn everything he could about our event to ensure we were a match. He then altered his content to ensure it was the right fit for our niche audience. Even if our attendees have seen Brian talk at other events, this presentation was specific to our event and therefore provided additional value to anyone repeat audience members."

THINK LIKE A FAN

The Future of Marketing and Relatability

Your marketing success isn't determined by you (the brand); it's determined by your customers. Contrary to popular belief, customers don't have a short attention span... they just have no time or patience for crappy content.

In order to reach your customers in the ways and places they prefer, you must create marketing from their perspective. This program teaches how to think like your ideal customer – and connect your story to their story.

By engaging with customers where they are today, and listening to where they will be tomorrow, you will also uncover who [and what] influences them.

In today's world, you can no longer expect customers to come to you... you must learn new ways to connect with them where they are.

In this program, individuals and companies will learn how to:

- Change your marketing from talking at your customers to talking with them
- Turn customers into fans and fans into influencers
- Empower user-generated content, influencer marketing, and employee advocacy
- Identify who your customers are – and how and where they want to receive information
- Amplify your offline experiences
- Reach the influencers who influence the people making the buying decisions

FUTURE-READY YOUR BUSINESS

The Future of an Innovative Workforce

Brian was the first government contractor to brief the Joint Chiefs of Staff at the Pentagon and not wear a suit and tie. The result of his presentation (on recruiting government employees) sparked a conversation around the importance of conformity versus empowering people for success. He paved the way for positive change in the toughest, regulated environment.

Everyone gets excited about new trends and technologies, but successful adoption of new ideas requires a culture that enables and supports change.

In this program, individuals and companies will learn how to:

- Create a culture that teaches self-awareness at every level
- Empower your employees to know what they don't know
- Understand the motivational drivers of your employees and team members
- Uncover strengths and weaknesses to identify the right leader for the right project
- Recognize employees who are digitally connected versus digitally unplugged
- Foster cross-generational collaboration that connects change, community, and a shared purpose
